### **DETAILED ACTION**

1. This Office Action is the answer to the amendment received on 11/29/2006, which papers have been placed of record in the file.
2. Claims 1-21 are pending in this application.

#### ***Response***

3. The examiner withdraws previous 35 USC 112, 2<sup>nd</sup> para. rejections due to the applicant's response and the amendment.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicants regard as the invention.

- In line 1 of claim 10, "claim 1" should be "claim 9".

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1, 5, 7-9, 16-17 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lau et al. (US Pat. 6,996,469).

Lau et al. teach a system, and a method to control a vehicle using both driver's inputs, and GPS input.

Besides teaching claimed common and well-known features in above claims: a GPS system generating a vehicle position signal for a vehicle; a plurality of driver inputs, a plurality of vehicle inputs; Lau et al. also suggest that:

- a controller coupled to the GPS system (see Lau et al., Fig.1 CONTROLLER 20, and a GPS receiver 40), the plurality of driver inputs and the plurality of vehicle inputs system (see Lau et al., Fig.1 refs. 45, and ODOMETER 35, rotational sensor 30).
- Lau et al. do not explicitly disclose that controller 20 determining a predicted path in response to the plurality of driver inputs 45, and the vehicle inputs (30, 35) and a desired path in response to the GPS system.

However, controller 20 would includes a comparison function to performing a comparison function: comparing of a predicted path obtaining (from GPS signals via GPS receiver 40) and a desired path (via driver input 45), said controller generating a control signal in response to the comparison (see Lau et al., col. 2 lines 10-24).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to implement Lau et al. teachings to explicitly disclose that a controller generating a control signal in response to the comparison from inputs of a GPS and from a driver for an advantage of clearly suggest that a comparison function could be made from 2 different inputs to display a selected result.

### ***Claim Objections***

6. Claims 2-4, 6, 11-15, 18-20 are objected for dependencies of rejected claims 1, and 16.

### ***Conclusions***
